DETAILED ACTION

Election/Restrictions

Applicant's election of Species XVII, referring to Fig 16 in Paper No. 16 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-24 are canceled. Election was made **without** traverse in Paper No. 16.

Response to Amendment

The Examiner renumbered claims 24-38 to claims 25-39 because the Applicant's representative canceled claim 24 in Paper # 10.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 25-39 are rejected under 35 U.S.C. 102(e) as being anticipated by Anderson et al US patent 6,200,347 B1.

Anderson et al disclose a composite bone graft comprising a body (73) with first and second ends, a plurality of holes extending between the ends (see Fig. 11B), two cortical end caps (70) having receiving regions, and a plurality of cortical struts (7).

Art Unit: 3738

Regarding claims 26, 28 and 33, the receiving regions are the holes or recesses made in the material (70). The Examiner interpreted the holes made in the cortical structure as the recesses. The Merriam-Webster Dictionary discloses the meaning of the word ---recess--- as the action of removing back or away. Therefore, material has been moved from element 70 to make the opening 5. The claims disclosed above are given their broadest reasonable interpretation. In re Pearson, 181 USPQ 641 (CCPA 1974).

Regarding claim 27, the struts has been entered in opening 5 by pushing the struts through the opening 5. Therefore, it has been press fitted into the opening.

Regarding claims 29 and 30, see col. 3, lines 21-23 and col. 48, lines 35-41.

Regarding claims 31 and 32, the cancellous bone is the osteoconductive material (see col. 17, lines 45-48).

Regarding claims 36-38, see Figs. 24, 25 and 10.

Regarding claim 39, the whole structure is capable of distributing the forces exerted to the implant.
